## Abstract of JP9006849

**PURPOSE:** To enable a user to easily make use of high-level home shopping services by displaying an image wherein an article to be purchased is put in a container on a display means when the article is designated.

**CONSTITUTION:** When the user enters a store and do shopping, a control means displays a shopping card 51 as the container for articles to be purchased and a store clerk 52 on a display 20 and expects an indication to be inputted by the user. When the article to be purchased is indicated with a pointing device, etc., the control means displays the image where the article 61 is put in the shopping card 51 on the display 20. In this case, the indication of the article to be purchased is inputted by specifying the article to be purchased among articles 60 displayed on the display 20 by the user with the pointing device.
